## compassionate care close to home

After a series of serious health events, transitional care patient Chuck Cernohous, 77, was back to splitting wood and more. Read his story at [allinahealth.org/chucksstory](http://allinahealth.org/chucksstory)

- Private rooms
- Low patient-to-nurse ratios
- High patient satisfaction scores
- 24-hour registered nurses and emergency department on site
- One-on-one physical, occupational, speech and respiratory therapy (as appropriate)
- Family conferences and discharge planning

# Definitions

## **Adult Family Home (Afh):**

Adult family homes of 3-4 beds are places where 3-4 adults who are not related to the operator reside and receive care, treatment or services above the level of room and board and that may include up to seven hours of nursing care per resident.

## **Certified Residential Care Apartment Complex (Rcac):**

Residential care apartment complexes (RCACs) are services provided in a homelike, community-based setting where 5 or more adults reside in their own living units that are separate and distinct from each other. Members who reside in the facility also receive the following services: supportive services (e.g., laundry, house cleaning), personal assistance (e.g., personal care), nursing services (e.g., wound

care, medication management), and assistance in the event of an emergency.

## **Community-Based Residential Facility (Cbrf):**

A community-based residential facility (CBRF) for elders or persons with physical or developmental disabilities is a place where 5 or more adults who are not related to the operator or administrator reside and receive care, treatments, support, supervision and training. (CBRFs for persons with developmental disabilities may only have up to 8 adults who are not related to the operator or administrator.) Services include supportive home care, personal care, supervision, behavior and social supports, daily living skills training, transportation and up to seven hours per week of nursing care per resident.

## **Skilled Care:**

A type of health care given when you need skilled nursing or rehabilitation staff to manage, observe, and evaluate your care. Nursing, physical therapy, occupational therapy, and speech therapy are considered skilled care by Medicare. In addition to providing direct care these professionals manage, observe, and evaluate your care. Any service that could be safely done by a non-medical person (or by yourself) without the supervision of a nurse is not considered skilled care.
