

Many factors influence the health and well-being of a community.

In 2008, five health priorities were identified by Healthier Together – St. Croix County as the top health priorities in St. Croix County.

Over the past years, community members have organized around these health priorities and have been trying to improve the health of St. Croix County.

It is now time to revisit our health priorities and plan to determine our strategies moving forward. The Community Health Needs Assessment Steering Committee is currently assessing the state of the county's health.

We need your help. The information you provide by completing this survey is essential. Your views and opinions will help us to better understand the health needs of St. Croix County residents. The survey will take **less than 3 minutes** and will be very useful for determining our steps going forward.

Click here to take the survey: <http://www.surveymonkey.com/s/9VBXG8M>. We invite you to share this link with people in your community that would like to have input on the St. Croix County health priorities going forward. The survey will close on November 21, 2013.

The goal is to create and maintain healthy communities through community action.

If you have any concerns or questions about the survey, please contact Deb Lindemann at 715-246-8363. Your responses to this survey are completely anonymous and confidential.

Thank you for your time and participation,

St. Croix County's Community Health Needs Assessment Steering Committee
